

Novedades de la Biblioteca del Instituto de Estadística y Cartografía de Andalucía

Publicaciones seriadas

Septiembre-octubre 2014

Instituto de Estadística y Cartografía de Andalucía
CONSEJERÍA DE ECONOMÍA, INNOVACIÓN, CIENCIA Y EMPLEO

PRESENTACIÓN

El presente boletín de novedades bibliográficas, con periodicidad bimestral pretende ser un instrumento para la difusión de la colección publicaciones seriadas en cualquier soporte, reunidas, conservadas y catalogadas en la Biblioteca del Instituto de Estadística y Cartografía de Andalucía. En él se diferencian dos partes:

- La primera, que contiene los datos relativos a título, ISSN y autor/editor de las publicaciones seriadas que se reciben en la Biblioteca y los números que han llegado en el período cronológico que abarca el boletín. Los títulos de las publicaciones seriadas están ordenados alfabéticamente.
- La segunda, que contiene los sumarios de dichas publicaciones.

Las publicaciones referenciadas en el boletín corresponden a las novedades ingresadas en la Biblioteca del Instituto de Estadística y Cartografía de Andalucía durante los meses de septiembre y octubre de 2014 y pueden consultarse gratuitamente en sus instalaciones en la siguiente dirección:

Obama and Islamic State
 America's plan is a decent one, but will take a worryingly long time to bear fruit; leader, page 14. America is gathering allies to fight extremists in Iraq and Syria; page 38.

Crackdown on NGOs
 Illiberal governments are blocking activists from receiving foreign cash. Liberal ones should not join in; leader, page 18. More and more autocrats are stifling criticism by banning non-governmental organisations from taking foreign cash; page 61.

Chinese soft power
 A decade ago China began opening Confucius Institutes abroad to promote its culture. Some people are pushing back; page 59. Chinese management ideas are beginning to get the attention they deserve; Schumpeter, page 68.

Advertising and surveillance
Snooping is the advertising industry's new business model. Privacy needs better protections: leader, page 16
Technology is radically changing the advertising business, with profound consequences, says our special report, after page 46

Convergence slows Incomes in the developing world are no longer speeding toward those in the rich: leader, page 15
Ten years ago, developing economies were catching up with developed ones remarkably quickly. It was an aberration, pages 24-26

Share buy-backs Companies are spending record amounts on repurchasing their own shares: leader, page 15. There are good reasons to worry about this, page 63

On the cover
Deflation in the euro zone is all too close and extremely dangerous: leader, page 11. The world needs inflation, but some countries face deflation, pages 21-24. Europe's leaders need to rediscover the will they showed during the euro crisis: Charlemagne, page 30. The debt of some euro-zone economies looks unsustainable, page 65

La Nota	2	El Censo de 2011 contiene una importante novedad metodológica, que supera el tradicional marco del registro para inscribirse en la utilización de la información ya disponible, contrastada mediante procedimientos de encuesta. Esta novedad supone el germen metodológico de la estadística pública para la utilización eficiente de las posibilidades que generan las bases masivas de datos. Ya en 2011, analizamos algunas de estas novedades, pero es ahora cuando ya disponemos de los resultados de este censo. Para ayudar a su explotación por parte de los usuarios, en este número analizamos la nueva metodología censal, sus límites y posibilidades, comenzando con una introducción en la nueva sección de "La Nota" sobre la historia de los censos realizada por Julio A. Pardos .
Entrevista a Gregorio Izquierdo Llanes	4	
Carmen Teijeiro Breijo y Jorge L. Vega Valle ¿Cómo se hizo el Censo 2011?	7	
Ana María Jurado Jiménez El Padrón y su relación con los Censos de Población y Viviendas	10	
Antonio Argüeso Jiménez ¿Cómo será el Censo de Población de 2021 en España?	13	Entrevistamos a Gregorio Izquierdo , Presidente del INE, sobre su experiencia durante estos años y los retos que se afrontarán a corto y medio plazo en esta Institución.
Entrevista a Carlos Ballano	16	
Adolfo Gálvez Moraleda La difusión de los resultados de los Censos 2011	20	Iniciaremos este número repasando la metodología del Censo de 2011 con el artículo de Carmen Teijeiro y Jorge L. Vega . El artículo de Ana María Jurado analiza la evolución del Padrón Continuo y su utilización como base fundamental del Censo. A continuación, Antonio Argüeso nos describe las tendencias actuales y cómo será, previsiblemente, el Censo de 2021.
Francisco J. Goerlich Gisbert Parque edificatorio y de viviendas en el Censo de 2011	26	También entrevistamos en este número a Carlos Ballano , Subdirector General de Muestreo y de Recogida de Datos del INE, que nos explica las últimas novedades y avances realizados en su Subdirección.
Julio Vinuesa Angulo La Encuesta Continua de Hogares, una nueva expectativa para el análisis demográfico aplicado	29	
Mireia Farré y Cristina Rovira Aportaciones de Idescat en la explotación del Censo de Población y Viviendas 2011	32	
¿Sabías que...?	35	El artículo de Adolfo Gálvez presenta las novedades que se han incluido en la difusión del Censo 2011 y el de Francisco J. Goerlich profundiza en el análisis del parque edificatorio y de viviendas que se puede realizar a partir de este último Censo. A continuación, Julio Vinuesa aborda la nueva Encuesta Continua de Hogares como estadística demográfica de referencia intercensal. Por último, el artículo de Mireia Farré y Cristina Rovira describe la utilización del Censo de 2011 en Cataluña para investigar la movilidad geográfica o el conocimiento de la lengua catalana.

Editorial

You would imagine that concepts underpinning the difference between histograms and bar charts had been settled decades ago. Nevertheless, teaching materials on this point can still be found that cause difficulties. We therefore have an article in this issue revisiting the topic by Patricia B. Humphrey, Sharon Taylor and Kathleen Cage Mittag. Our last issue featured much on the Birthday paradox. While all that material clearly illustrates the complexities of conditional probability, in this issue, we offer an editorial on some ideas around teaching probability. Essentially, we reflect on probability as a way of reasoning about the way we observe the world, rather than as a consequence of some axioms. Certainly in the UK, you can find text books at primary level (aimed at 9-10 year olds) dealing with probability. And it is interesting to note that various definitions of probability

(frequency, symmetry, subjective) are intermingled in the exercises. The article by Jorge López Puga in this issue should make sure we have tools to clarify this point. A few of our articles in this issue are of most interest to teachers working with the upper end of the 9-19 age range. Dustin Jones and Stephen Scariano present another way of trying to help students understand variance. David Trafimov offers an argument around the use of the coefficient of variation, whereas while Marcin Kozak and Agnieszka Wnuk offer thoughts on use of Tukey mean difference/Bland Altman plots (showing that not every pair of continuous variables has to be visualized as a conventional scatterplot). Mickey Dunlap shows how to use stock market data to introduce the Poisson distribution. As usual, we feature an excellent Statistical Diversions column.
