# presentation

Andalusia Basic Data is an annual publication belonging to the Andalusian Institute of Statistics . Its aim is to facilitate the comprehension and analysis of the different facets, which shape the economic and social reality of the Autonomous Region.

The publication offers, in a comfortable format, a compendium of the most updated statistical information. It is organised in 16 thematic chapters and arranged in more than 120 tables and graphics.

This edition corresponding to the year 2000 presents some novelties of content that deserve to be pointed out. In the chapter about the Territory and Environment, we offer new information about the surface of the different territories of the Autonomous Region of Andalusia, thanks to a cartographic revision and to the application of new techniques in the estimation of geographical demarcation. On the other hand, the chapter Trade and Tourism incorporates data about prices (in previous editions this information was located in the chapter on Household Revenues and Expenditures). The third novelty can be found in the section Finances and Business in which we included facts and figures from the Central de Balances de Actividades Empresariales de Andalucía (Central of Business Balances in Andalusia). Lastly, the chapter relating to Great Figures of the Regional Economy presents data taken from the Quarterly Accounting of Andalusia, carried out by the Andalusian Institute of Statistic.

Andalusia Basic Data is, by nature, a markedly informative publication about the available data of the Autonomous Region of Andalusia. Due to this, in order to make easy the data interpretation, this edition includes methodological notes about the statistical operations carried out, and information about concepts, used variables, as well as data resources. Besides, at the end of each thematic section, users will find references to other sources from which they can obtain more information.

Scholars and agents of the economic and social life, and society in general, will have at their disposal a synthesis of the most relevant information about Andalusia, which will be useful and valuable for their professional and daily task.
