# presentation

Andalusia Basic Data is an annual publication belonging to the Andalusian Institute of Statistics. Its aim is to facilitate the comprehension and analysis of the different facets which shape the economic and social reality of the Autonomous Region.

The edition corresponding to 1999 comprises a set of updated information. It is organized in 17 thematic chapters and arranged in more than 120 tables and graphics. It has been done in an easy to use size and presents an attractive design that makes pleasant its use.

With regards to last edition, it has been increased the statistic information in three main aspects: environment, economy and business network.

In relation to environment, new information has been included about climatic conditions and the evolution in the quality of Andalusian beaches. In the economic field, it has been included the main magnitudes of the supply and the demand in the Andalusian economy. As for the business network, information about its structure and dimension has been provided.

The publication has a strong spreading nature related to the information available about the Andalusian Autonomous Region. Due to this, in order to make easy data interpretation, this edition includes methodological notes about the statistical operations carried out, and information about concepts, used variables, as well as data resources. Besides, at the end of each thematic section users will find references to other sources from which to obtain more information.

Scholars and agents of the economic and social life, and society in general, dispose of a synthesis about the Andalusian most relevant information, which will result useful and valuable in their professional and dayly task.

Magdalena Álvarez Arza  
Counsellor of the Regional Government Department for Economy and Treasure  
President of the Andalusian Statistics Council
